## Enrollment Decline to Continue

- Peak enrollment in 2000 was 2,393
- 2012-13 (excluding tuition) is 1,944

■ Decline over 12 years was 449

- Projected 2022-23 (excluding tuition) 1,552
- Decline over 10 years will be 392
- Projected 2022-23 with Barrington 1,628

## Enrollment Report 2012-2022

- Describe LRPC Purpose and Methodology
- Present the ten year enrollment projections
- Explain why enrollment has been declining and why this is likely to continue.
- Questions and Discussion

## Summary of LRPC Goals

- Provide the School Board with enrollment projections for each of the next 10 years.
- Make every effort to provide projections for the following school year in the fall when they can be used in the budgeting process.
$\square$ Continually improve and refine the model used to make enrollment projections.

## Methodology

- Multiple linear regression equations based on historical and projected births and enrollment trends are used to project students in kindergarten and grade 1.
- Grade Progression Ratios (GPRs) are used to forecast the number of students in grades 2 through 12.

## Projections for Grades 2-12

- Calculate GPR's for each grade and year
- Find the 5-year average GPR for each grade.
- Apply 5-year average GPRs to actual and predicted enrollments to predict enrollments into the future.
- Takes into account the net migration (inmigration and out-migration) over time and by grade (different GPR for each grade).

## What is a "Grade Progression Ratio?"

| Number of students in |
| :--- |
| grade J and year t |

A numerical example:

200 students in $5^{\text {th }}$ grade in 2009 + 10 new students join ORSD at the $6^{\text {th }}$ grade for 2010
-15 students leave ORSD before $6{ }^{\text {th }}$ grade in 2010
$=195$ students in $6^{\text {th }}$ grade in 2010

GPR (5th to 6th $=195 / 200=.975$ )

## GPRs Reflect Net New Students

- More families with children moving in than moving out
$\square$ All GPRs are in the range of $1.01-1.03$ except High School, which is impacted by tuition students

## Elementary School Split

- Historical ratios used to estimate Kindergarten and grade 1 split between the schools.
- District-wide GPR used to project grades 2-4 based on projections for grades 1-3 at each school.
- Future housing changes and redistricting are not reflected in the projected elementary split.

## How Accurate Are the Projections?

- Backcasting (running today's model against historical data to "predict" historical enrollment) shows the model to be most accurate in the near term with average error of estimate approximately (plus or minus) 2\% on total enrollment one year out.
- The average error of estimate increases as we project further out in time, reaching about (plus or minus) 8\% when projecting ten years into the future.

## How Close Were 2011Projections?

LRPC Enrollment Projection vs. Actual 2012-13

|  | LRPC Final 2011 Projection For 2012-2013 | Preliminary October 1 <br> For 2012-2013 | Actual Higher (Lower) Number | Actual Higher (Lower) Percent |
| :---: | :---: | :---: | :---: | :---: |
| Grade School Total |  |  |  |  |
| Kindergarten | 113 | 116 | 3 | 2.7\% |
| Grade 1 | 150 | 129 | (21) | (14.0)\% |
| Grade 2 | 147 | 144 | (3) | (2.0)\% |
| Grade 3 | 144 | 144 | 0 | 0.0\% |
| Grade 4 | 157 | 158 | 1 | 0.6\% |
| Grade School Total | 711 | 691 | (20) | (2.8)\% |
| Middle School |  |  |  |  |
| Grade 5 | 166 | 166 | 0 | 0.0\% |
| Grade 6 | 141 | 146 | 5 | 3.5\% |
| Grade 7 | 161 | 168 | 7 | 4.3\% |
| Grade 8 | 169 | 171 | 2 | 1.2\% |
| Middle School Total | 637 | 651 | 14 | 2.2\% |
| High School |  |  |  |  |
| Grade 9 | 152 | 150 | (2) | (1.3)\% |
| Grade 10 | 172 | 179 | 7 | 4.1\% |
| Grade 11 | 174 | 166 | (8) | (4.6)\% |
| Grade 12 | 179 | 176 | (3) | (1.7)\% |
| High School Total | 677 | 671 | (6) | (0.9)\% |
| Total Enrollment | 2025 | 2013 | (12) | (0.6)\% |

## The Projections

Enrollment Projections For Oyster River School District 2012 Actual to 2022 Projected

Average Absolute Error of Estimate
Percent Error
To Total

| Year | K | $\mathbf{1 - 4}$ | $\mathbf{5 - 8}$ | $\mathbf{9 - 1 2}$ | Total |  |  |
| :--- | :--- | :--- | :--- | ---: | :--- | :--- | :--- |
| $2012-13$ | 116 | 575 | 651 | 671 | 2013 | Actual Year | $2 \%$ |
| $2013-14$ | 114 | 556 | 650 | 675 | 1995 | One Year Out | $3 \%$ |
| $2014-15$ | 108 | 545 | 637 | 687 | 1978 | Two Years Out | $4 \%$ |
| $2015-16$ | 111 | 529 | 645 | 671 | 1956 | Three Years Out | $5 \%$ |
| $2016-17$ | 89 | 527 | 615 | 705 | 1936 | Four Years Out | $6 \%$ |
| $2017-18$ | 84 | 497 | 594 | 705 | 1880 | Five Years Out | $6 \%$ |
| $2018-19$ | 86 | 465 | 583 | 690 | 1824 | Six Years Out | $6 \%$ |
| $2019-20$ | 89 | 433 | 565 | 698 | 1785 | Seven Years Out | $6 \%$ |
| $2020-21$ | 91 | 402 | 564 | 665 | 1723 | Eight Years Out | $7 \%$ |
| $2021-22$ | 91 | 400 | 532 | 643 | 1665 | Nine Years Out | $7 \%$ |
| $2022-23$ | 91 | 408 | 497 | 631 | 1628 | Ten Years Out | $8 \%$ |

## Highlights: Current to 2022-23

(1) Total enrollment drops by 385 or 19\% over 10 years.
(2) High School enrollment decreases by 40, as the forecasted increase in Barrington tuition students (based on prior year's eighth grade) does not fully offset the decline in resident high school students.
(3) Middle School enrollment declines by 154
(4) Elementary school enrollment declines by about 192 students over 10 years.

## HS Tuition Students in Projection

|  |  | tion Stu | ents |  |  | HS Total |

Oyster River School District
Actual and Projected Enrollment by Grade Grouping
1972-2022

## Actual and Projected Enrollment plus and minus Average Error of Estimate

## How Do We Know Enrollment Will Decline?

■ US Census data shows fewer children living in the district in 2010 than in 1990.

- The number of adults of childbearing age living in the district has declined sharply.
- Lower birth rates statewide, in New England and nationally.
Fewer children are being born and births drive enrollment.

## Number of Children in ORCSD

 Source: U.S. Census Bureau

# Births after the 2010 Census to Mothers Residing in ORCSD 

■ 72 from April 1, 2010 to March 31, 2011.

- 69 from April 1, 2011 to March 31, 2012.

## Births By Cohort Year (Oct 1 Sept 30) Drive Enrollment

| Births to Mothers Residing in ORCSD |  |  |  |  | 2012 | Grade |

## ORCSD Adults in Prime Childbearing

 Years Source: Us Census Bureau

## Birth Rates at Historic Lows, Lowest in New England States

- Nationwide, the fertility rate, defined as births per 1,000 women 15-44 years of age, was 64.1 in 2010 and 63.2 in 2011, the lowest ever recorded.
- New Hampshire's fertility rate was the lowest in the nation in 2010 at 51.5 followed by
Rhode Island 52.1, Vermont 52.6, Maine 53.6 Massachusetts 54.0, Connecticut 54.5.
- All other states had higher fertility rates.

Source: US Department of Health and Human Services

## Demographics Drive Decline

Dramatic Decline in Adults of Childbearing Age, taking account of net move-ins

- Lowest birth rate in the nation in NH and NE
- Confirmed by Actual Dramatic decline in Births over the past 10 years: 130 in 2002 cohort, 70 in 2012 cohort

## Changing Demographics Predicted in Statewide Studies

NH Center for Public Policy (September 2007)
"The population that is school-aged...is now expected to level off and decline slightly by 2020."
Carsey Institute The Changing Faces of New Hampshire: Recent Demographic Trends in the Granite State (2007)
"Between 1990 and 2000, the number of people 25 to 34 in New Hampshire declined by 23 percent... despite a net inflow of young adults during the period" This is attributed to a "birth dearth" in the 1970s.

## Summary

- Total ORCSD enrollment is projected to decline significantly, by almost 400 students over 10 years from just over 2,000 in 2012-13 to just over 1,600 in 2022-23.
- The number of elementary school students will decrease, with elementary enrollment dropping by about 200 students over 10 years.
- Middle school enrollment, now 651, is projected to drop to under 500 by 2022.
- High School enrollment, now 671, will rise to about 700, then decline to 630, as the projected number of Barrington tuition students added during the period does not offset the drop in resident students.

## Any Questions?
